### ***What is Easy Street?***

**Easy Street** is a unique rehabilitation program where clients can re-learn the skills they need after a neurological injury.

### ***Who are our clients?***

Any adult who has suffered an illness or injury to their brain or neurological system and requires further rehabilitation interventions to reach their potential. These illnesses or injuries may include stroke, head injury or traumatic brain injury.

**Easy Street** staff assist clients to achieve the physical, emotional and social adjustments necessary for a productive, independent life. Clients must require a team approach and may see a combination of the following: Physiotherapist, Occupational Therapist, Social Worker and/or Dietitian as needed.

Clients may be referred to other WRHA services when needed such as outpatient speech- language therapy or psychology.

### ***What is the main purpose of rehabilitation at the Easy Street program?***

A client-centered program aiming to assist our clients to reach their full potential by achieving the goals they have identified. Regaining independence in areas such as dressing, cooking, attending school or work, or participating in leisure activities are often goals our clients set for themselves.

### ***Who can refer?***

A potential client, any health-care professional, concerned friend or family member can make a referral to the Easy Street Program.

Referral forms are available on the Misericordia Health Centre website ([www.misericordia.mb.ca](http://www.misericordia.mb.ca)) or by calling the Easy Street office at 204-788-8158

### ***Is there a cost?***

Therapy at **Easy Street** is currently covered by Manitoba Health at no cost to the client.

### ***How often/frequently are clients seen?***

This can vary, but it is usually once per week. Length of treatment varies according to client needs and progress.
